

4mm 5mm 5.5mm 6mm 8mm 10mm golden bronze reflective glass

Introduction

Golden bronze reflective float glass, sometimes call dark bronze color reflective glass, it's a kind of high-performance heat reflective glass, produced by coating with one or more layers of metal, alloy or metal compound film on the glass surface, to change the optical properties of the glass, to meet certain requirements.

We have online coated gold bronze glass and offline coated golden bronze glass, also call hard coating golden bronze color reflective glass and soft coating golden bronze float reflective glass, their main difference is offline coating reflective glass could be produced as per customer's requirement, no matter for size, thickness or color, but the online coating reflective glass has the limitation of size, color and thickness. The advantage of the online coating glass is it's coating surface is very durable, can't be easy to scratch.

Features

- The golden bronze color reflective glass allows the right amount of natural light into the building, while at the same time reduces glare and save some cost for window blinds and other interior shading devices.
- The solar control golden bronze reflective glass could reflect a portion of incoming solar radiation, which limits heat penetration into the building and can potentially lower HVAC usage.
- With bright and shine golden color, the gold float reflective glass can decorate the buildings, make the building more conspicuous and attractive.

Specifications

- Type: online reflective glass and offline reflective glass
- Thickness: online 4mm, 5mm, 5.5mm, 6mm, 8mm, offline 4mm, 5mm, 5.5mm, 6mm, 8mm, 10mm, 12mm
- Available Standard Size: 2140x3300mm, 2250x3300mm, 2140x1650mm, 2250x1650mm, 2440x1650mm, 2440x3300mm, sometimes 1830x2440mm, any customized size could be produced.
- Available Processing: custom cut size architectural golden color reflective glass, golden bronze color reflective tempered safety glass, golden color [reflective decorative laminated glass](#), low U value golden bronze color [reflective insulated glass](#)

Applications

Based on the high performance, the golden bronze reflective glass products are more and more popular for architectural facades, widely used as energy saving [glass windows and doors](#), external structural glass walls, double pane glass curtain walls, glass claddings, etc.
