

China glass manufacturer 8.38mm dark blue color reflective laminated safety glass price

About 8.38mm dark blue reflective laminated glass:

8.38mm dark blue reflective laminated glass is made of one piece [4mm dark blue reflective glass](#)+0.38mm one layer PVB film+4mm clear or [low iron float glass](#).

Advantages:

- 1) High visible light transmitting rate, low reflecting rate, low radiating rate ($e < 0.1$), reduce UV transmittance and slow indoor things fading.
- 2) The intermediate PVB layer of the laminated glass has the function of reducing noise.
- 3) Control solar energy radiation effectively, cooler in summer and warmer in winter, save expenses of air conditioners.
- 4) Hard coating can't be affecting when cut, bent, tempered, heat strengthened and laminated.
- 5) It can add aesthetic senses to building appearance.
- 6) Laminated glass interlayer film has strong tenacity, when attacked by external forces, it is difficult to be penetrated, and the glass splinters will not scatter, so for property protection and personal safety, are very good choices.
- 7) One way mirror effect, when you see from outside, it looks like a mirror and you can't see everything inside, but people inside can see you very clearly.

Reflective laminated glass specification:

Combination: 4mm dark blue reflective glass+4mm ultra clear glass/ 4mm clear float laminated glass

Thickness: 8.38mm, 8.76mm, custom request thickness depends on usage.

Standard size: 2140x3300mm, 2440x3300mm, 2140x1650mm, any custom cut to size could be produced.

More options:

Thickness: 8.38mm (4+0.38mm+4mm), 8.76mm (4+0.76mm+4mm), 10.38mm (5+0.38mm+5mm), 10.76mm (5+0.76mm+5mm), 11.14mm (5+1.14mm+5mm), 11.52mm (5+1.52mm+5mm), 12.76mm (6+0.76mm+6mm), 13.14mm (6+1.14mm+6mm), 13.52mm (6+1.52mm+6mm), etc.

Color of glass: clear, euro bronze/golden bronze, black/dark grey/euro grey/smoke, dark green/F-green/light green, dark blue/ford blue, etc.

Reflective laminated glass application:

Reflective laminated glass has the energy saving characteristics and safety performance, so it has a wider application in the engineering construction.

8.38mm dark blue reflective laminated glass you can buy standard size from us, then cut into small size to use as door, window, home decoration and railing, etc.

Curtain wall glass, skylight glass can make 8.38mm dark blue reflective laminated glass process into [reflective insulated glass](#), it will be more heat preservation and energy saving.

If your design needs other colors like green, grey or bronze, we also supply more than 8 color reflective laminated glass. Welcome to ask more details from us.

8.38mm dark blue reflective laminated glass:

Blue reflective laminated glass window,curtainer wall,etc.
