

Curved glass shower doors China supplier

Glass shower doors, glass shower walls, glass shower enclosures, glass shower screens, it's more and more popular, it includes flat shower glass panels, and curved shower glass panels, and even the [curved glass](#) is more expensive than flat glass, some clients prefer the curved glass for shower room, do you know why?

- Compare to flat glass shower panels, the curved glass shower cabins are more flexible. The house price is higher and higher at present, so if we buy a very small house, we should use the space reasonably, to make our life more comfortable. If we use curved glass to build the bathroom, we could design the glass as per the space, even only a small corner, the curved glass could make the bathroom bigger and more useful.
- Compare to other material like concrete, use curved glass to build the bathroom, in one hand, could help us save a lot of space, in another hand, could help us save a lot of material cost and installation cost, and the glass shower room is easy to install, clean and replace.
- Use curved glass to build the shower room, can match any personal design, we could produce any shape (round, oval, irregular, etc.), any function (clear curved glass for light transmittance, [frosted curved glass](#) for privacy protection, screen printing curved glass for decoration, etc.), and any customized size.
