

Import 8mm dark green color reflective glass from China

Introduction

8mm dark green reflective glass also named as 8mm one way reflected green glass, 8mm dark green hard coating glass, 8mm dark green coated glass. In this process, semi-conducted metal oxides are directly applied to the glass during float glass production, while the glass is still hot, in the annealing lehr. These coatings are called hard coatings, and are relatively less harmful to the environment.

Specification

Thickness: 8mm. Other available thickness is 4mm 5mm 5.5mm 6mm 10mm

Color: dark green. Other available color such as Euro bronze, dark bronze, Euro grey, dark grey, F green, Ford blue, dark blue.

Available size: 2140*3300mm, 2140*1650mm, 2250*1650mm, 2440*1650mm, 2250*3300mm, etc., any customized size could be cut.

Deep processing: Easy to be cut, tempered, laminated, insulated, etc.

Characteristic

Color: Enriched glass transmits generous levels of visible light and offers color neutrality, which also enhances the tint of the glass substrate underneath the reflective coating.

Visibility: Reflective glass also has a special metallic coating that makes it possible to see out, while preventing people from seeing in, in order to preserve privacy during the day.

Glare Control: Reflective glass also impacts visible light transmittance and allows just the right amount of natural light into a building, while at the same time reduces glare and the need for window blinds and other interior shading devices.

Application

- 1.Windows
- 2.Skylight
- 3.Curtain wall
- 4.Balustrade

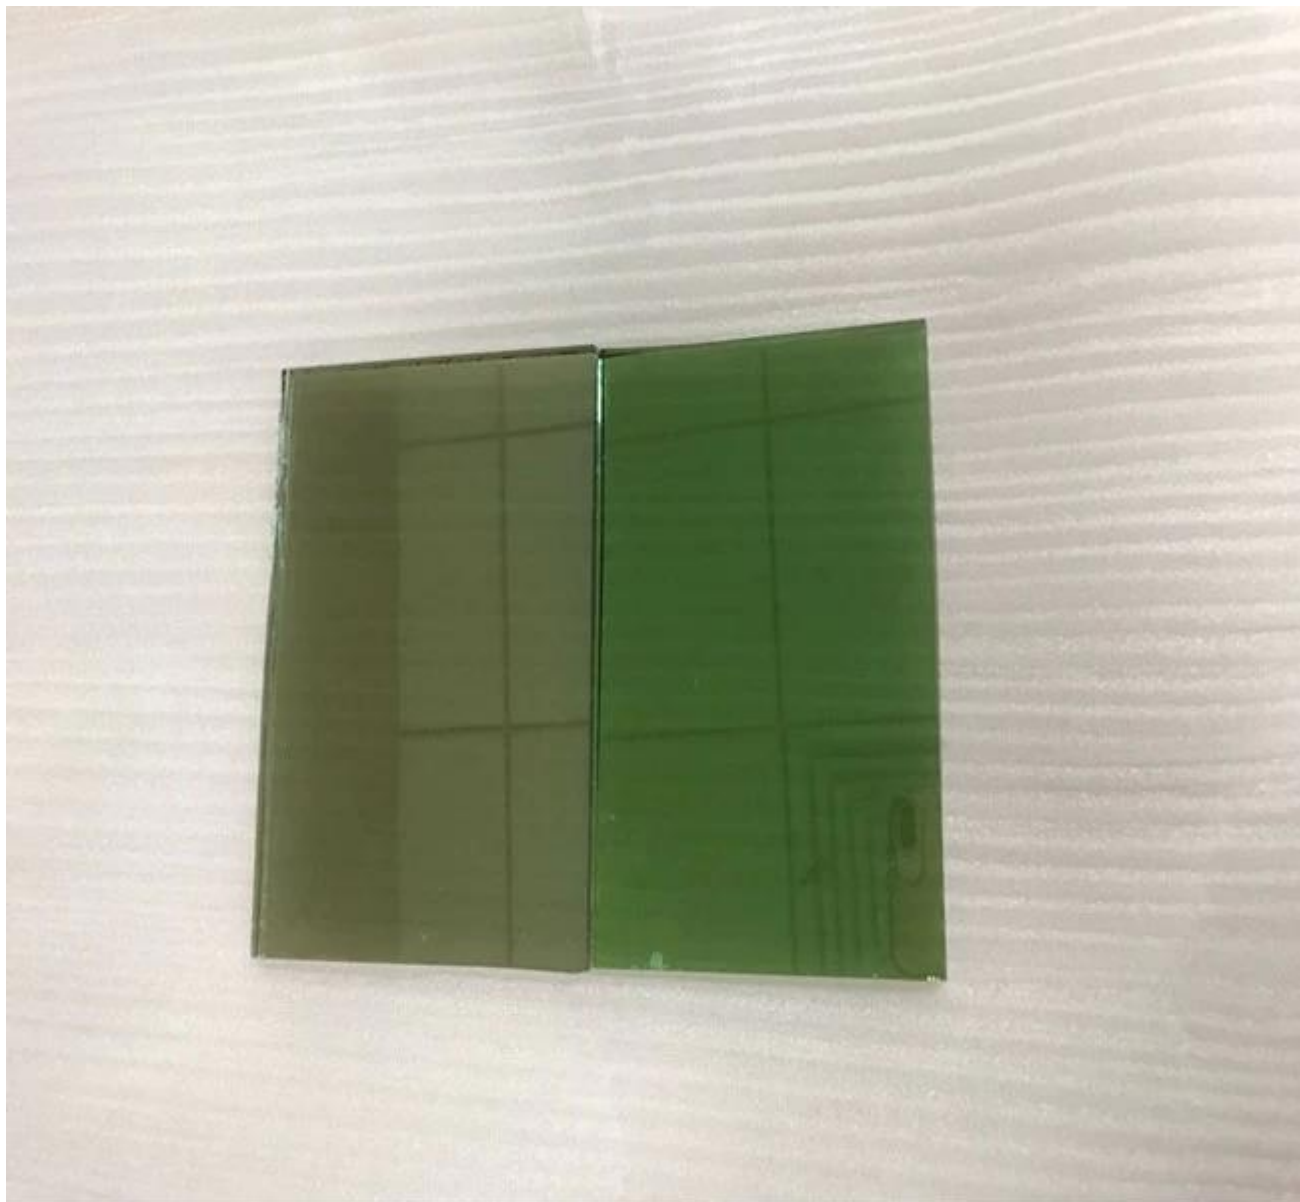

Other product

Except 8mm dark green reflective glass, other dark green reflective glass you can get from SHENZHEN JIMY GLASS such as [4mm dark green reflective glass](#), [5mm dark green reflective glass](#), [5.5mm dark green reflective glass](#), [6mm dark green reflective glass](#), 10mm dark green reflective glass.
