

Cheap price 6mm bent curved glass furnitures manufacturer China

Cut to size bent curved glass 6mm

6mm bent glass, it also called 6mm curved glass, which is made of [6mm float glass](#), is firstly heated to softening point on metal mould and then bent to shape by weight of glass itself and outside force, then finally cooled down. Curved annealed glass can be produced to custom designs and has the advantage of being able to be cut and processed after it has been bent to its desired shapes.

Nowadays many objects use the bent glass, most applications are for smaller projects: curved china cabinet glass, boat windshields, revolving doors, show cases, hand rails, greenhouses and glass chandeliers, shelf, etc. Bent glass products come in different shapes: curved bow, l shape, s shape, butterfly shape, j bend, in 90 and 180 degrees.

The advantages of bent curved glass

1. It performs highly adaptable, you can design the shape as you want. It doesn't like tempered curved glass, [tempered curved glass](#) only can be standard circular arc.
2. It can be secondary processing, like cut, drill hole, etc.
3. It needs make the mold to start the production.
4. Hot curved glass can produce cylinder, cone, "S", "Z", "U", another three-dimensional irregular shape.
