Brief Introduction

Clear Float glass is the core base product for most of common glass products, it is derived from the manufacturing process where molten glass is poured from the furnace and floated evenly onto a bed of molten tin. The glass is gently cooled under controlled conditions to anneal the glass which enables the glass to be cut and modified.

Characteristic

- Optical clarity with high light transmission
- Smooth and distortion free flat surface
- Easily fabricated like cut, tempered, laminated, etched, etc.
- Flexible specification to reduce slice loss
