

6mm solar control reflective glass china, low e reflective glass sheets, euor grey low e reflective glass factory.

6mm reflective glass is coated one or more metal layer chemical compound on the glass surface, The reflective glass technology of product processing can change optical performance, The characteristic of is good wearproof and corrosive substance, the reflective glass be based on clear tempered glass. The [reflective glass](#) divided into solar control reflective glass, low e reflective glass, conducting film glass

The low e reflective glass features

Solar Control: The glass reflects a large proportion of the solar radiation, thereby restricting the heat gain inside the building.

High visible: Reflects away the right quantum of daylight so as to limit glare, while allowing adequate amount of natural light.

Superior durability: High wear and superior scratch resistance.

Ease in processing: It can be processed like a normal float glass

The advantage of low e reflective glass rather than normal glass?

1. UV Protection and Reduce the radiation, normal float glass can reach 0.84 emissivity, the reflective glass have coated an silver film can turn down 0.15 emissivity.
2. High visible: Normal float glass visible is 80%~88%, low e reflective glass 71%~75%. have no astigmatism phenomena .
3. Low-carbon environment, reflective glass upon on silver film can reduce the temperature transmit that it have an comfortable climate for warm in winter and cool in summer.

Application:

Home window, Building wall ,Offices, Commercial buildings, Schools

Specification:

Glass name: 6mm euor grey reflective glass

Max size: 2140X3300mm, 2140X1650mm, 2250X1650mm, 2440X1650mm, 2250X3300mm

Thickness range 4mm 5mm 5.5mm 6mm 8mm 10mm

metal film: silver, cuprum, tin

Products combined: coated glass , low e glass, tempered glass , insulated glass , laminated glass

Glass types: tempered insulated glass, low-e insulated glass, insulating glass, double glazing glass, reflective insulated glass, window glass, insulated glass for curtain wall.

Color: dark blue, ford blue, dark green, light green/euro green, dark grey, light grey, euro grey. Bronze/euro bronze, dark bronze

Application for building wall ,Offices,Commercial buildings,home windows

Product line

 JIMMY
