

Export energy saving 4mm+9A+4mm insulated glass curtain wall from China

About insulated curtain wall glass

4mm+9A+4mm [insulated glass](#) curtain wall also named 4mm+9A+4mm insulated glass wall, 4mm+9A+4mm IGU double glazing glass wall. The modern high-rise building curtain wall is made of insulated glass which is combined of different performance glass with dry air and noble gas. 4mm+9A+4mm insulated glass curtain wall is consisted of two piece of 4mm single glass with 9mm aluminum spacer thick. Such as tinted reflective glass, [low-e glass](#), clear glass, etc. It has the advantages of soundproof, heatproof, frost prevention, anti-moisture and wind resistance. As reported, when outside temperature is -10°C, the single glass wall temperature will reach -2°C, but the interior temperature is 13 °C which use the double panels glass as insulated glass. What's more, in hot summer, the insulated glass can keep out 90% solar radiant heat, but the sunshine still can come into interior through the glass wall, most importantly, you will not feel hot in this way. It is really realized the great performance of keeping cool in summer while keeping warm in winter. It leads a green life for people.
