

Factory directly competitive price of glass floor, frosted tempered laminated glass floor

For safety we usually use triple or more layers tempered laminated glass for floor

The triple tempered laminated glass floor is combined by 3 sheets tempered glass with PVB/SGP interlayers.

Annealed glass VS monolithic tempered glass VS laminated glass:

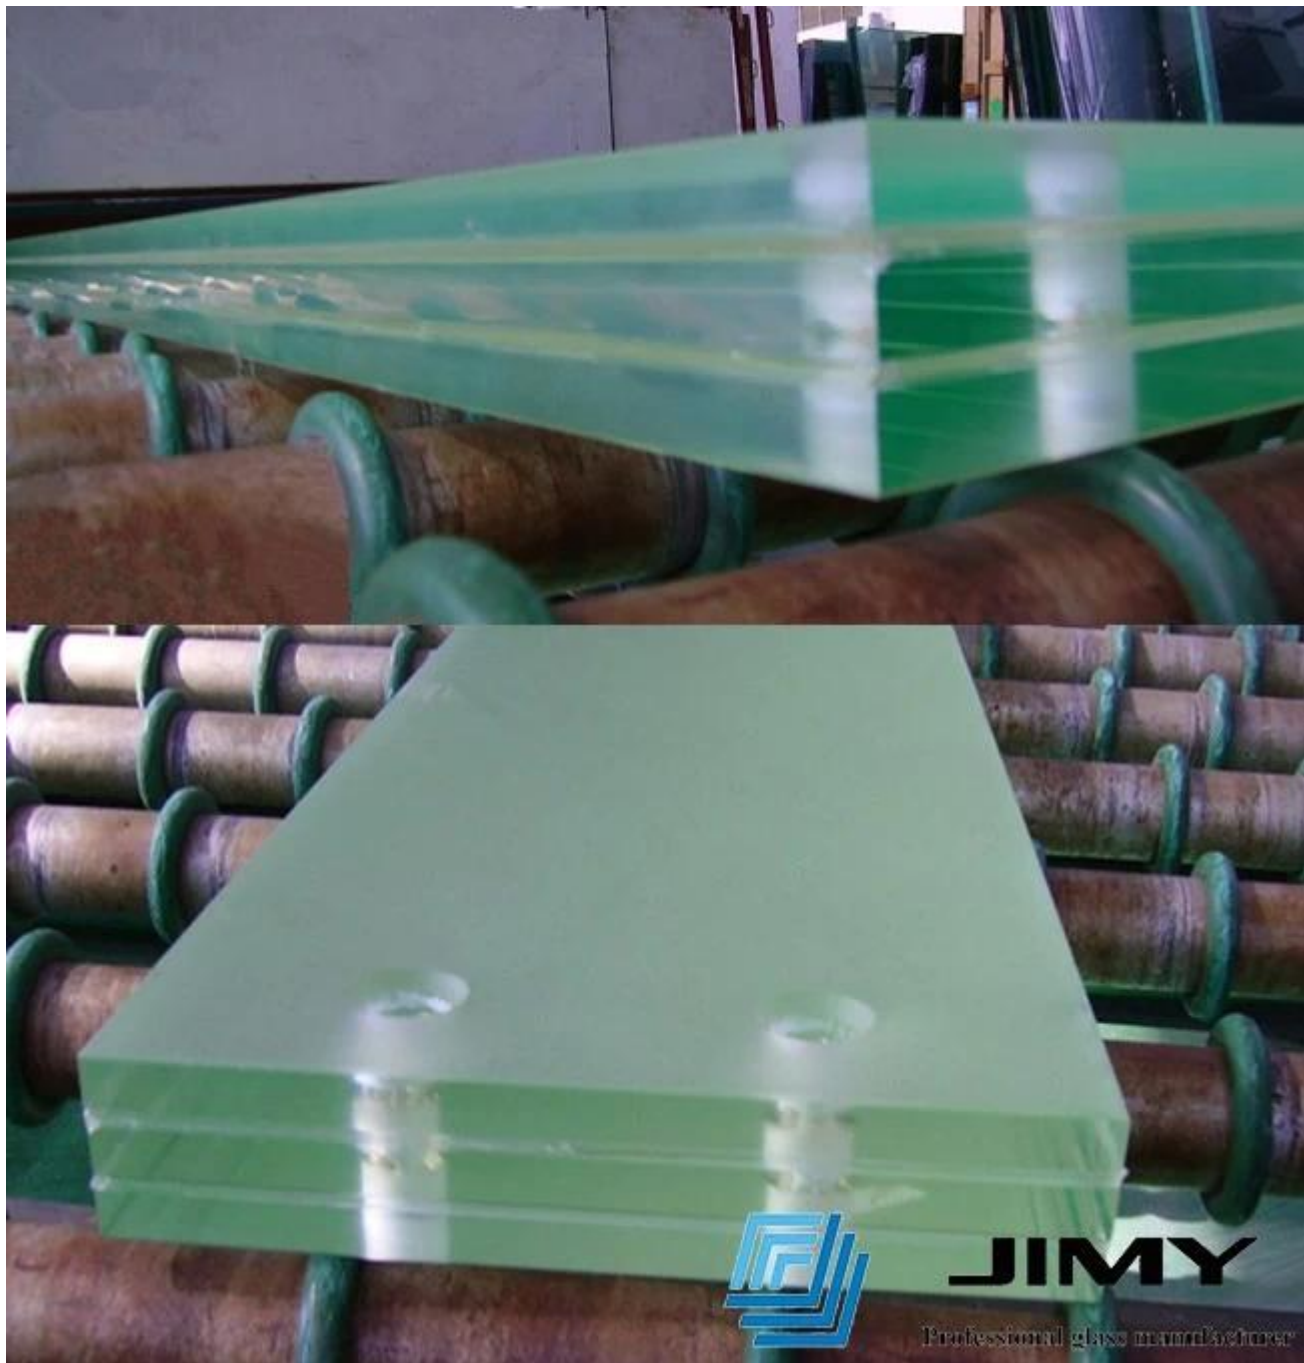

Our tempered laminated glass quality is with ISO standard controlled and CE, SGCC certificate approved, 100% will not delaminated even under big strike and big temperature difference.

Can pass any strike and impact test as customer required.

Advantages of frosted glass floor:

1. Smooth and silky surface, translucent and matte in appearance;
 2. Does not scratch off like coating;
 3. High light transmittance ensures maximum light, still maintaining privacy.
- So it does not seem so dangerous like transparent glass floor.

Transparent glass floor VS frosted glass floor:
