What's the advantage of 8mm non-fingerprint tempered glass?

8mm obscure tempered glass is make of hydrofluoric acid and other chemical drugs on the glass surface for a special processing, so that the original glass reflective surface into a matte non-reflective surface. The principle is to use double-sided or single-sided through a special processing. Compared with ordinary glass, it has a lower reflectivity. The reflectivity of the light is reduced from 8% to less than 1%. To create a clear and transparent visual effects with technology. In this way, viewers can experience better sensory vision.

Usage of 8mm frosted tempered glass

As a kind of safety building glass material, and due to its characteristic of easy to learning, allowing the right transparency while keeping privacy, 5 times stronger than ordinary float glass, It's widely used as windows and doors glass, shower enclosure glass, partition wall glass, safety railing glass, table top glass etc.
