

Starphire ultra clear low iron tempered laminated low E insulated glass curtain wall

Glass facades always used insulated glass, ensure high quality normally used laminated [insulated glass](#), because its safety glass. Low iron tempered laminated Low e insulated glass, is the best composition for glass facade, which is combination all the glass advantages. The low iron glass is lowest self-explosion, with highly light transmittance, good transparent, is very safety and durable, cause of [tempered glass](#) after broken is been small particle, is not harmful and the PVB/SGP film will laminated together the small particle, is not drop off. And the [Low E glass](#) can not only keep warm and heat insulation, but also have the effect of environmental protection and energy saving. So is more and more popular by the designer and the owner.

Insulated glass specification:

Insulated glass thickness: 4+5A+4,5+9A+5,6+12A+6,8+12A+8, 10+12A+10, 12+12A+12,etc.

Glass color: clear ultra clear, grey, bronze, grey, brue,etc.

Glass shape: flat or curved

Glass size: 3000x8000mm

Original glass: clear float glass, tinted glass, reflective glass, low e glass, tempered glass, [laminated glass](#),etc.

What kind of insulated glass you can choose from JIMYGLASS group?
