

Order online 8mm10mm12mm cut to size for laminated glass table top price

Laminated glass is a type of safety glass that holds together when smashed . it features a flat surface with a uniform thickness that provides an unobstructed views,When you are shopping for new laminated glass for a new project, table top, or even [laminated glass for flooring](#), skylights swimming pool , comparing various types of laminated glass is necessary to ensure you get the most out of your investment, Any thickness, sizes, shapes, and colors of laminated glass you can order online in jimy Glass Co.Ltd Glass china distributor.

Difference between Laminated glass and tempered glass

Tempered glass is made by heating and cooling a piece of standard glass in a tempering furnace,tempered glass is typically used. This type of glass is commonly used in doors and windows,If it is broken, it shatters into smaller, less harmful fragments.

[Laminated glass PVB](#) is basically a glass sandwich. It is made of two or more plies of glass with a vinyl interlayer(PVB SGP,EVA) between (sandwiched, if you will, as in a cars windshield). The glass will tend to stay together and case one in is broken -thus qualifying as a safety glazing material.
