

Wholesale decorative 553 F-green tempered laminated glass factory

11.14mm green tempered laminated glass

11.14mm green tempered laminated glass is made of 2 sheets of 5mm F green [tempered glass](#) and 3 layers of PVB, which are permanently bonded by heat and pressure. Even though while it's broken, fragments usually adhere to the plastic layers, reducing injury risks.

Why 553 ESG laminated glass is popular among the building material?

Because of its strength and safety features, laminated glass is preferred when any of the following are required:

1. Hurricane and impact resistance
2. Protection against bombs or other explosions
3. Sound reduction
4. UV prevention
5. Protection against forced entry
