

China good quality 5mm clear Flora patterned glass on sale

What's 5mm clear Flora patterned glass?

5mm clear Flora patterned glass is also called 5mm clear Flora figured glass, 5mm clear Flora embossed glass or 5mm clear Flora rolled glass. It engraved a decorative texture by steel mold, on one or both sides of the glass sheet. Which is a flat glass processed by calendaring method. Due to its unique decorative benefit. In one hand, it allows the adequate light come to the interior, in the other hand, it prevent the clear view from outside. It result in privacy protection and appearance decoration.

Manufacture processing of patterned glass:

Single roll method: Pouring the glass melt on the rolling forming table, which is made of cast iron or cast steel. Then the roller is spreading on the glass melt, in this way, [patterned glass](#) is come out, the last step is through annealing furnace.

Double roller method: Production of embossed glass is divided into two way, consecutive semi-continuous rolling and rolling process. The glass melt through a pair of water-cooled roller then pull to the annealing furnace. The lower roller surface with a convex pattern and upper is a polishing roller which forming patterned glass.
