# NORMAL CLEAR FLOOR GLASS VS ULTRA CLEAR FLOOR GLASS

1<sup>st</sup> 1. Ultra clear glass is a type of glass that has a very low iron content, which makes it appear much clearer than standard clear glass. It is often used in applications where high clarity is required, such as in display cases, museum windows, and high-end architectural glass.

2<sup>nd</sup> 2. Ultra clear glass is also known as low iron glass or low iron clear glass. It is made from a special batch of glass that has been carefully controlled to have a very low iron content.

3<sup>rd</sup> 3. Ultra clear glass is also known as low iron glass or low iron clear glass. It is made from a special batch of glass that has been carefully controlled to have a very low iron content.

Ultra Clear Glass

1. Ultra clear glass is a type of glass that has a very low iron content, which makes it appear much clearer than standard clear glass. It is often used in applications where high clarity is required, such as in display cases, museum windows, and high-end architectural glass.
