

10mm acid-etched frosted glass balustrade supplier,safety railing glass manufacturer in China

About 10mm tempered frosted glass:

10mm tempered frosted glass raw material is good quality [10mm clear float glass](#). We make it after acid treatment, it becomes an obscure glass. Acid-etched frosted glass is an opaque, attractive glass type. Shading is applied either in full or a design, which allows in light, but blurs the shape of items behind the glass panel. This trendy glass produces a smooth and sweet white hue to the glass surface, reflectively emitting a soft light.

People used 10mm tempered frosted glass to be railing glass, fence, balustrade, because of its rich attributes such as human harmless, sturdy construction, toughness and thermal strength, also it lets light in but provides privacy, that makes designers have more ideas to achieve.

10mm tempered frosted glass specification:

Custom size: Maximum 3000*8000mm, Minimum 150*300mm, depend on design.

On the balustrade glass, any special processing could be done perfectly by your design, such as:

- Trapezoidal shape glass panels for stair handrail
- Precise holes or cutouts for fittings installation
- Flat polished edges to avoid human hurt by the sharp edges
- Round safety corners to avoid defects during transportation or installation
- Many others.

If you need more strong glass use in outside to against the stronger wind, you can consider to choose [SGP laminated glass](#) made by 2 pieces of 10mm acid-etched frosted tempered glass, it will be the safest glass.

For [curved shape balustrade](#) design, we can produce safety bending frosted glass by your request.

10mm acid-etched frosted tempered glass application:

10mm acid-etched frosted tempered glass can cut into size to fitting indoor railing and outdoor balustrade, frameless glass railing, topless glass railing.
