

12mm toughened glass balustrade price,4+4mm laminated glass balustrade for balcony

Toughened glass balustrade is made of clear toughened laminated glass. Tempered glass has been processed intense heating and rapid cooling in a controlled process. Tempered glass will not break into sharp shards, but will instead break into small pieces or fragments.

Jimmy Glass Co. Ltd supply toughened glass balustrade. Here at Jimmy Glass and glazing we supply high quality toughened and laminated glass for strong, durable glass safety features for a host of applications, including: banisters, balustrades, canopies, balconies, glass handrails.

Why to use tempered laminated glass for balustrade?

- 1 **Safety**, because of tempered glass has been processed intense heating (600-650°C), and rapid cooling in a controlled process. and will not cut or cause harm as easily as regular glass.
- 2 **High difficulty glass processing**, including extra large tempered glass, multi-layer laminated glass, triple silver low e insulating glass units.
- 3 **Sound proof** laminated glass is made of PVB or SGP panels can block the sound transmission, and reduce the noise.
- 4 **Beauty sense** you can see the scenery for everywhere.
