

China manufacturer 5mm F-green float glass,5mm light green tinted glass factory

5mm F-green float glass is prized for its high light transmission, optical clarity and ability to be fabricated to meet customer needs for performance and aesthetics. More than 24 years of manufacturing experience have resulted in the highest quality float glass for a variety of building and commercial applications.

Green tinted glass is a [transparent float glass](#) produced by adding an oxide of metals into raw materials in the float glass process. Being manufactured by this process, green tinted glass can effectively absorb the heat while offering a green aesthetic appearance.

5mm light green tinted glass features:

- 1) The body tinted float glass can reduce transmission of the sun's harmful rays by up to 80% thus minimizing fading to interior furnishings.
- 2) Tinted float glass can be bent, tempered or heat strengthened and in addition can be silk-screened or enameled.
- 3) The comprehensive range of soft natural colors compliments and harmonizes with modern building materials to provide an exciting and different look to new or existing buildings.

Application of 5mm french green tinted float glass:

Green glass can not only absorb the heat but also reflects the infrared up to approximately 40% which can lead to a dramatic reduction in energy costs. Its pleasing greenish colour can reduce the transmission that results in unwanted glare and discomfort. Green glass reduces the transmission of ultraviolet light and subsequently minimizes the colour fading to furniture and flooring, more widely used for:

Windows

Exterior construction

Doors

Solarium
Mirrors
Tabletops
Skylights
Handrails
Atriums
Curtain wall
Furniture applications
