

China safety staircase glass manufacturer

Staircase glass, also name stair tread glass, stair step glass, stairway glass, stair floor glass, it is more and more wide use on the stair of residential, commercial, industrial buildings, because the glass not only could create space and light, but also will give the building a magical feel. And the glass is very easy to clean and replace.

As per our more than 20years' experience, most of the customers prefer the [triple safety tempered laminated glass](#) to build the staircase, because it is possible to get the required strength to hold the weight of itself and the people to walk on it. As a professional glass processing factory, we produce many different types of three layer laminated glass:

Clear tempered laminated glass, this is the most common safety laminated glass, use three pieces clear safety [tempered glass](#) combine together with PVB or SGP, this is the most cheap price staircase glass.

Sandblasted tempered laminated glass, it uses the [sandblasted glass](#) on the first piece, to make sure the glass is anti-skid, it is opaque, could protect privacy. For the sandblasting, can do full surface sandblasting, or area sandblasting, or line sandblasting, all depends on customer's requirement.

Screen printing decorative laminated glass, it is made from one piece [screen printed glass](#) with two pieces clear toughened glass bonded together with colorless PVB or SGP. The screen printing glass, is a kind of anti-slip glass, also a kind of decorative glass, could make the stair more esthetic. We could do full surface color screen printing glass, also could do dot silkscreen glass, line silkscreen glass, etc. The color is variety, select by customers.

Special processed embossed laminated glass, it is the most safety non-slippery stair tread glass, we could produce any convex pattern glass. Because of special processing way, the cost of this kind step glass is much higher than other kind of stair walkway glass.

Specification of the stair tread glass
