

8.76mm 44.2 not transparent grey laminated float glass safety glass for construction

Why use the 44.2 not transparent grey laminated glass for construction?

- **Super strong and high safety.** The 8.76mm [pvb laminated glass](#) is combined with two pieces 4mm clear glass with two layers 0.76mm pvb, the glass will stick on the pvb even the glass is broken or damaged by the outside force, won't fall down to hurt the humans, and if the glass is tempered, it will be 3-5 times stronger than normal float glass based on the same thickness;
- **Anti-Ultraviolet.** The laminated glass grey color pvb could absorb 99% of incoming ultraviolet radiation, help to protect the furniture or appliances from discoloring and damage;
- **Very good decoration effect.** The grey color laminated glass, will be different than normal clear laminated glass, install it on the construction, will make the construction stand out from other buildings;
- **Protect the privacy.** Use another 0.38mm white color pvb with the grey color pvb to make the laminated glass, could make the glass is not transparent, help you protect the privacy, or block objects you don't want people to see.

What's the specification of the 44.2 not transparent grey laminated glass?

- **Composition:** 4mm clear float glass+0.38mm grey color pvb+4mm white pvb+4mm transparent float glass, the glass can be tempered, also can be non-tempered, but if you install the glass on the high rise building, tempered will be stronger and more safety
- **Size:** we have standard size 1830x2440mm, 2140x3300mm, 2140x3660mm, 2250x3300mm, 2250x3660mm, 2440x3660mm, also accept custom cut size
- **Package:** all the glass will be packed in strong export plywood crates, to avoid glass damaged during transportation
- **Production time:** 10-15 days after order is confirmed
