

# China 10.38mm jumbo size clear laminated glass supplier

## About 10.38mm Clear Laminated Glass

10.38mm clear PVB laminated glass is made of two pieces of [5mm clear float glass](#) sandwiching a layer of 0.38mm PVB film, by highly pressurized and industrial heating process. The lamination process results in the glass panels holding together in the event of breakage, reducing the risk of harm.

## 10.38mm Clear Laminated Glass Characteristic

High Security:

When laminated glass is attacked by outside force, it is hard to be penetrated because PVB film has strong tenacity. When the glass is broken, the splinters will stick on the PVB interlayer and not scatter off.

Sound Insulation:

PVB interlayer is an effective absorber of sound. Therefore, the laminated safety glass offers better sound insulation performance than the pure glass with the same thickness.

Create aesthetic sense to building:

10.38mm laminated glass will beautify the buildings and harmonize their appearances with surrounding views which meet the demand of architects.
