

China Factory supply 8+8 10+10 silk screen printed decoration glass panels ceramic fritted safety tempered laminated glass interior and exterior building glass price

In modern architecture, decoration glass is increasingly used as a decorative material. Tempered laminated glass with silk screen printing could be processed with the decoration pattern as your need. The realization of an individual pattern, both in the form of pictures and graphics, allows the creation of an unrepeatable composition. silk-screen printed glass can perform not only a decorative function, but also that of practical use for long time. It is easy for cleaning and maintain. The color will not changes.

[Tempered laminated glass](#) is the safety glass due to it combines with two pieces of tempered glass panels and PVB or SGP film, which processed with high temperature by laminated glass autoclave operated by professional workers. To have high performance of daily use, [low iron super clear printed glass](#) is much better than normal clear printed glass for decoration. Higher transmittance and more security are the characters of super clear tempered laminated glass.
