

# China Hot Sale 4mm Dark Blue Reflective Glass Supplier

## About 4mm Dark Blue Reflective Glass:

4mm Dark blue reflective glass are base on [4mm dark blue tinted glass](#) have a extremely durable coating , “hard coat” reflective glass can be glazed with the reflective coating to either the inside or outside of the building depending on aesthetics and performance required. Metallic coating owing to opaque feature can create slight prevention in seeing through glass.

This particular type of glass is based on one-way sight concept, making activities inside the building invisible to those looking from the outside of the building. Furthermore, reflective glass prevents UV rays from entering your room.

## Reflective Glass Features And Benefits:

- 1.Delivers a multitude of choices for builders, developers, architects and interior designers to get creative with their designs.
- 2.Provides protection from UV rays and cuts out the solar heat, thus, providing optical comfort and a more soothing atmosphere inside the building.
- 3.Reflects light during the daytime, which means that people outside cannot see inside the building thus ensuring privacy for the people inside.
- 4.Available in a variety of shades and in various thicknesses to meet every architectural need.

## Dark Blue Reflective Glass Application:

Dark blue reflective glass can be tempered or used in combination with other glasses in a laminated or double-glazed unit, for providing solar, thermal and acoustic insulation.

- External use of windows, doors, skylight, roof, balcony, curtain wall, etc.
- Interior glass screens, partitions, balustrades, walls, etc.
