

# China Hot Sale 5mm Copper-Free Mirror- Durable and Environment Friendly

## What is 5mm copper-free mirror?

Copper-free mirror is made by [5mm clear float glass](#) or [5mm low iron glass](#) coating the back paint without lead and copper element. It is environment friendly when the mirror breaks into pieces. Copper-Free mirror has been formed to serve a variety of functions without implementing copper into the mirror. Use non-copper film process and two layers of water proof paint. It prevents heavy metal contamination with copper and lead by using non-lead materials, copper free silver mirror can be used more years, because the copper content in silver mirror will accelerate the mirror to be eroded.

## Copper free mirrors characteristics:

- Eco-friendly: new manufacturing procedure is eco friendly is it excludes use of the lead and copper. Polluting products are reduced and very easy to recycle.
- Enhanced optical quality: imaging perfect and high reflection because exclusion of copper from silvering procedure.
- Higher Durability: lead and copper free silver mirror surpasses durability requirements is three times that of the conventional [silver mirror](#)
- Double water-proof paints for chemical and physical protection.
- Easy to cut to any shape, and polished edges
