The advantage of black PVB laminated glazing

10.38mm grey laminated glass is safety glass, the PVB keeps the glass from breaking apart easily and provides high sound insulation. What's more, laminated glass blocks nearly 99% of ultraviolet light transmission. When 5+5mm dark grey laminated glass was broken, it also doesn't break apart into large pieces. Broken pieces of laminated glass stick to the internal tear-resistant plastic layer so they stay in one large sheet.

Application for black PVB laminated glazing

1. 10.38mm dark grey laminated [railing glass](#)
2. 551 black balcony laminated glass
3. 5+5mm black laminated glass partition wall
4. 10.38mm grey laminated [glass windows and doors](#)
