

Heat insulation 7mm ultra clear U profiled glass supplier China

About U glass

7mm Low iron U glass is a 7mm supper clear U shaped glass., we also called it 7mm super white U glass, 7mm U profiled glass. It is a kind of rolled glass obtained from a shaping process in glass furnaces controlled by a computer system. It has constant quality and precise size. Thanks to its U shape section, it has better mechanical strength than general glass. It allows a bigger span during installing and does not need additional supporters so that a batch of additional building materials can be saved. What's more, it has a good light transmittance, heat insulation, energy saving and high mechanical strength.
