### **Why choose tempered laminated glass as skylight glazing?**

1. Natural light can emphasise interior designs in a great way, accentuating colors and helping to increase the positive ambience within the room.
2. Glass features with excellent U-values help your home to maintain comfortable levels of heat and insulation throughout the year. A glass roof or sunlight has been proven over time to help you save money on your household bills: as with the savings on light, increased insulation will mean less need for you to turn your heating on during the chillier months of the year. For larger homes – those that typically have substantial bills during the winter – this can represent a big saving over time.
3. An effective glass roof or conservatory can offer you what is essentially additional living space, as long as the project adheres to the necessary building regulations. By giving you a space outside the home that is protected from the elements, a glass roof will almost certainly make your property more valuable.
