

China 19mm safety sandblasted tempered glass

INTRODUCTION

19mm sandblasted safety toughened glass, it is a kind of opaque privacy protection glass, which firstly produced by heating annealed float glass to over 600°C and cooling it rapidly, which locks the outer surfaces of the glass in a state of high compression, and the core or center of the glass in compensating tension, and then do the sandblasting on the glass surface.

SPECIFICATION

- Size: Max 3300x8000mm, any customized size
- Color: clear, ultra clear, bronze, blue, green, gray, black, etc.
- Processing: custom cut size, polished edges, drill holes, cut notches, laminated, etc.
- Type: 19mm clear sandblasted toughened glass, 19mm ultra clear sandblasted tempered glass, 19mm color decorative sandblasted safety glass, etc.

FEATURE

- High Strength, it is about 5times higher than normal annealed glass.
- High Safety, when it is broken, it turns into obtuse angles granules, not sharp pieces, which is human harmless;
- Privacy protection, after doing the sandblasting, it is opaque but allow the light transmittance, which could help protect privacy, and the sandblasting surface is not smooth, which also could be anti-slippery;
- Customized processing like cut custom size, drill holes, polished edges, cut notches, etc., should do before tempering.

APPLICATION

19mm sandblasted tempered glass, could be monolithic used, also could make into 19+19mm or 19+19+19mm or more layers sandblasted tempered laminated glass, applied as [decorative table top glass](#), office partition wall glass, [anti-slip floor glass](#), safety staircase glass, [frosted balustrade glass](#), etc.
