

# China good price 8mm 1/3 inch Ford blue color tinted float glass distributor

## Introduction about 8mm Ford blue tinted glass

8mm Ford blue [tinted glass](#) is produced by adding metal oxides to float glass during manufacture. It's also named 8mm Ford blue float glass, 8mm light blue color tinted glass. Because tinted glass reduces the amount of light transmitted, it also absorbs the solar energy. This added heat causes thermal stress which may affect the glass. It is a kind of energy-saving decorative glass that can absorb heat rays in the sun and maintain good transparency. Also called colored heat-absorbing glass which is widely used for construction industry, for example: windows, doors, curtain wall, balcony, table tops, shelves, cabinet, etc.
