

## China best quality lacquered glass table tops manufacturer

[Lacquered glass](#) table top, also named painted glass table tops, spandrel glass table top, varnished glass table top, is use the top quality [clear float glass](#) or [low iron float glass](#), through depositing a highly durable and resistant lacquer onto the flat and smooth surface of the glass, then by carefully baking into the furnace which is constant temperature, permanently bonding the lacquer onto the glass. Lacquered glass has all the features of the original float glass, but also supplies wonderful opaque and colorful decorative application.

### Lacquer Glass table top Characteristic

- Painted surface is flat and smooth, easy to clean;
- Supplies wonderful translucent and colorful decoration
- Water-resistant and moisture-resistant
- Use lead free safety paint, human harmless and environmental protection

### Difference Between Lacquer Glass and [Screen Printing Glass](#)

- Both lacquer glass and silkscreen glass is decorative glass, could do any color and any pattern
- Lacquer glass is produced by depositing lacquer onto the glass, then baking into the furnace, screen printed glass is produced by silk-screen printing ceramic frit paints onto glass, then drying and heat-treating
- Lacquer glass has smooth and flat surface, the surface of silkscreen glass will have little impurities because of heat-treating
- The surface of lacquer glass is easy to scratch off, but the surface of silkscreen glass is strong, hard to scratch off

Lacquered glass has all the features of original float glass, and screen printing glass has all the features of [tempered glass](#)

- Lacquer glass most often use in interior, silkscreen glass most often use in exterior because of the durable surface
