

Customized hot selling clear tempered reeded fluted la-wave ribbed glass factory

What is fluted tempered glass?

Fluted glass is a texture glass, someone named reeded glass, or ribbed glass or La-wave glass. Its a pattern glass, been a very popular [decorative glass](#) used in interior and exterior building. As its decorative and privacy protect function, create mysterious beauty feelings. widely used on glass window, glass door, glass partition wall, [glass railing](#) and so on. So its more and more popular installed in architecture building,

especially the hotel , commercial building, supermarket, and many other place.

The **ribbed tempered glass** you can choose the original glass of clear float glass or ultra clear glass/ low iron float glass to make as per desire. And you also can design the width of the lines, and the depth as per demand, there's different pattern lines can be choose, such as narrow line ribbed glass, wide line fluted glass, crystal fluted glass, diamond fluted glass and so on all are available as per desire, the different design the effect which are different,we all can matching your requirements if you can give us the details of depth, width, thickness and so on. The thickness can be 4-19mm customized to matching different engineering requirement.

How to produce fluted ribbed/ reeded glass?

There's two ways produce fluted glass, one is using hot rolling method forming a ribbed glass effect, heating glass to soften point and then transfer to the metal roller to roll on the glass surface to making the groves in a certain shape. there's normally two standard reeded, one is wider reeded and other is small reeded. Thickness can be choose 4mm, 5mm, 6mm.

The another method is carving/ engraving produce by the glass engraving machine, produce by the glass CAD drawing input into the computer, then transform the pattern design into CNC engraving glass machine. Then carve the glass and polish the lines to form the exactly deigns patterns according clients requirements. In this produce processed way, clients can design the depth, width and many other required as per desire, but as you know that the special customized cost which will be more expensive than the first processed way as is standard pattern.

Various type design engraving /carving decorative glass

If you want been more safety can choose fluted tempered laminated glass. And can used the color PVB film to laminating which can make the fluted laminated tempered glass More decorative and beautiful.
