China manufacturer wholesale good price 8mm dark grey float glass

About 8mm dark grey float glass:

8mm dark grey float glass is produced by the float process with the addition of small quantities of metal oxides to color the normal clear glass mix. This coloration is achieved through adding metal oxides at the smelting stage. Addition of color does not affect the basic properties of the glass,but dark grey glass can absorbs and re-radiates solar energy reducing heat, providing cost efficient climate control. It also reduces sun glare and is aesthetically appealing.

8mm dark grey tinted glass features:

1) The body [tinted float glass](#) can reduce transmission of the sun's harmful rays by up to 80% thus minimizing fading to interior furnishings.
2) Tinted float glass can be bent, tempered or heat strengthened and in addition can be silk-screened or enameled.
3) The comprehensive range of soft natural colors compliments and harmonizes with modern building materials to provide an exciting and different look to new or existing buildings.
4) Flat surface,easy to cut, suitable to bent, tempered, heat strengthened and laminated.
