

Energy Saving 4mm Euro Grey Reflective Glass Made In China

About Reflective Glass:

Euro grey tinted reflective glass is [On-line coated reflective glass](#), it produced by using CVD technology (chemical vapor deposition) that creates a perfect uniform layer of metal oxide chemically bonded to the surface of the glass. As this hard chemical layer is fully bonded to the glass, the glass can be cut, bent, tempered, heat strengthened and laminated without affecting the coating. As the coating is extremely durable, "hard coat" reflective glass can be glazed with the reflective coating to either the inside or outside of the building depending on aesthetics and performance required.

4mm Euro Grey Reflective Glass Characteristic

- High visible light transmitting rate, low reflecting rate, low radiating rate ($e < 0.1$).
- Avoid the light pollution and build good ecological environment.
- Filter sun UV ray, prevent interior furniture to be faded.
- It can be cut, bent, tempered, heat strengthened and laminated without affecting the coating.
- With good shading coefficient and with visible energy efficient effect
- It can add aesthetic senses to building appearance
- Control solar energy radiation effectively, block far infrared radiation, save expenses of air conditioners in summer, save heating expenses in winter, have good effect of heat preservation and energy saving.

4mm Light Grey Reflective Glass Available Standard Size

2140x3300mm, 2250x3300mm, 2140x1650mm, 2440x1650mm, 2440x3300mm, etc., any customized size could be produced.

Jimy Glass provide full range of colors and thickness reflective glass:

1. Color: clear, extra clear, french green, dark green, ford blue, dark blue, bronze, dark grey etc.
3. Thickness: 4mm 5mm 5.5mm 6mm 8mm 10mm
4. 2140x3300mm, 2140x1650mm, 2250x3300mm etc could be produced as per request.

Reflective Glass Application:

- External use of windows, doors, skylight, roof, balcony, curtain wall, etc.
- Interior glass screens, partitions, balustrades, walls, etc.
