

China wholesale decorative high strength and safety function VSG 442 frosted laminated glass for railing .

To produce VSG 442 laminated glass, first of all, you need to produce one 4mm frosted glass panel. This frosted glass panel is usually processed by acid etched treatment. Comparing to sandblasting treatment, acid etched glass surface will be much more softer and smooth. With better appearance for decoration.

After cutting and edgework, one option process is tempering, when you choose tempering process to enhance the strength, the glass will be have higher resistance to scratches and have better thermal stability.

VSG 442 frosted glass for railing will manifest a very good decorative appearance, a simplified modern beauty. If you choose a gradient milky color, the scenery will add a sense of mystery.

Specification of VSG 442 frosted laminated glass for railing

Configuration	4mm frosted + 0.76 pvb + 4mm clear
---------------	------------------------------------

Shape	Flat / curved
