

Floor mounted Aluminium U channel glass balcony railing, frameless glass balustrade

Aluminum U channel base has become one of the most popular install ways of glass railing, especially for frameless glass balustrade.

For [railing glass type and thickness](#), please click here and know more about it.

Why we choose Aluminum U channel base for glass balcony railings?

1. Stable structure.

Aluminum U channel base is a continuous U shape segments, which can supply stable fixation for glass railing on the base.

2. Concise design, smooth lines, make it perfect for frameless glass balustrade

There are many types of Aluminum U channel, with different cross section, and different structure. Here with our top seller Aluminum U channel for your reference.

The advantages of the best seller:

1. Multiple fix ways, to meet different surrounding requirements.

2. Available for different thickness railing glass from 12mm to 18mm.

3. Easy to be installed, and stable structure after installation. No need hole drill in glass.

**screw the aluminum groove to the floor
and drill the drain hole**

install the wedge

install glass pad

install the tempered or laminated glass

**turn the screw downward to secure
the glass**

put the top cover over the screw
