

Chinese hot sale high quality frameless frosted glass railing suppliers

JIMY GLASS factory is one of famous glass factory in China, our main products is tempered glass, laminated glass, we can produce the small radius of 480mm (depend on the glass thickness) and the jumbo size of 3300x12000mm(depend on the glass thickness, the more thick the more large panel can be make) and the irregular shape glass to matching different project required.

Today we would like to introduce you about the frameless glass balustrade, you can learning more details as below:

Frameless glass balustrade is one of the popular frameless glass balustrade by the market. you can choose tempered glass or [laminated glass](#) as per required. for tempered laminated glass is the most safety type glass for glass railing. about the tempered laminated glass If the glass size small the length not over 1meter and the height not over 1.2meter too, in order to save the cost you can choose two layer PVB tempered laminated glass is enough safety and stronger, but if the glass you want which is need drilling holes, notch/cutout then have to used 1.52mm PVB film to make, and if you are choose SGP film to make , 0.89mm SGP film is okay, because the SGP film five times stronger and up to 100 times stiffer than PVB film. So that SGP laminated glass railing which is more stronger and durable than PVB laminated glass balustrade.

About the frameless glass balustrade, except the colorless glass railing is popular by the market, the

another most popular type is frosted glass balcony balustrade. Why there many people like the frosted glass balcony balustrade? Because of that which is can light transmitting and the same time can better to keep privacy protective that can matching people demand. For the frosted glass balcony balustrade people always like to used laminated glass balustrade which is more safety than frosted tempered glass railing.

Our JIMYGLAS factory with many years experienced on produce high quality glass balcony railing for the clients. We can have two ways to make the frosted glass balcony balustrade for you choose, one is frosted PVB/SGP laminated glass railing and another is frosted laminated glass balustrade. What's the different between them? The front which used a anneal float glass laminating with layer of PVB/SGP film to make, and the last is used two panel of frosted acid etched glass bonding together with the clear PVB/SGP film to make. Both of them are similar on the appearance, but the last one the cost more expensive and its more obscure/ hazy, if someone prefer to like the more good effect of privacy can choose the frosted laminated glass balustrade type. Here below the pictures for you reference.

What's the difference between PVB laminated glass and SGP laminated glass?

Both PVB laminated glass and SGP laminated glass are safety/ security glass,the main different as below:

1- Name: SGP is SentryGuard Plus Interlayer, made from USA Dupont, PVB is Polyvinyl butyral, have many different suppliers.

2- Thickness: The PVB thickness of 0.38mm, 0.76mm, 1.14mm, 1.52mm,etc ; the SGP thickness is 0.89mm, 1.52mm, 2.28mm, 3.04mm,etc.

3- Strength: The SGP laminated glass is five times stronger and up to 100 times stiffer than PVB laminated glass.

4- Safety: The SGP laminated glass is stand up when broken, while the PVB laminated glass is fell down.

5- Clarity: The SGP yellow index is smaller than 1.5, while the PVB yellow index is 6-12, so the SGP laminated glass is much more clear than PVB laminated glass.

6- Application: With the high security performance, the SGP is widely used to against the severe weather like storms, hurricane and cyclone, and it don't need frame while use as balustrades. But for PVB laminated glass, if use them to against the bad weather, it is easy to delaminate.
