shower screen tempered glass

Normally the shower glass always used the tempered glass, because of its physical strength impact resistance, and bending resistance which 4-5 times than same thickness of anneal glass, the toughened glass, even broken, its on small particle, thus ensuring the safety of life to the maximum and bringing you a safe and comfortable bathing environment.

How to avoid the shower glass self-explosion?

1. Can consider to used the low iron tempered glass(also name ultra clear toughened glass), because of the low iron glass with highly purity, without impurity, with lowly self-explosion, only 1/10000.
2. The tempered glass which may be self-explosive after use, do heat soaked processed which to artificially broken in advance in the factory's heat soaked furnace, thereby reducing the self-explosion of the tempered glass in use after installation. So choose heat soaked tempered glass is the best option to avoid self-explosion.

How to distinguish your shower glass make by tempered glass or not?

1. Glass after tempered processed if you look it under the sun to can see colorful, if un-tempered then under the sun couldn't distinguish the colorful.
2. When you're knocking the tempered glass, the voice rather dull, if un-tempered glass the voice clear and melodious.
3. Been broken, the tempered glass was broken is on small particle, the non-tempered glass which on sharp to harmful people.

How we quality control for your shower glass panel?

We full sets advance production machines to matching different processed required, to make sure fast production time;

Cutting Machine	Edging Machine	Water Jet Machine
		
Automatic Drilling Machine	Tempering Machine	Curving And Tempering Machine
