

Full solution of aluminum frame glass railing balustrade, glass balcony, aluminum handrail manufacturer

Similar as [stainless steel railing post + glass railing](#), aluminum glass balustrade is also very popular now.

And, aluminum glass balustrade is with some own advantages:

1. The aluminum glass balustrade structure is simple and the aluminum material is light: the product structure is assembled without welding points, and is assembled with aluminum alloy profiles, aluminum alloy guardrail accessories and screws. The connection is tight and there is no loosening and falling off, and the safety performance is high. The aluminum alloy balcony is easy to be installed, easy to process.

2. aluminum balustrade is with high strength, strong flexibility and good corrosion resistance. Compared with other traditional materials, the hardness of aluminum art profile can withstand greater impact and tension, and has better flexibility. The surface of the aluminum alloy balcony guardrail is treated with anti-oxidation, which can make the aluminum alloy product have a high corrosion resistance function.

3. The colors of aluminum balustrade are diversified, and the spacing of the products has been carefully measured and verified, which not only plays a role in safety protection, but also enhances the appearance and visual effect and the taste of tallness. The personalized color design makes the aluminum balcony The guardrail can be matched and assembled according to the customer's requirements to meet the customer's home life needs.

4. Aluminum balustrade is a green, healthy and environmentally friendly product. In the current harsh environment, aluminum alloy guardrail manufacturers adopt products with high environmental protection and safety performance in accordance with national standards, creating a safe and healthy environment for households. Living space.
