

4mm dark green reflective float glass

Introduction

4mm dark green color heat reflective float glass, it's a kind of online hard coating glass, made by coating one or more layers of metal (such as chromium, titanium) or metal compound film on the glass surface to change the optical properties of the glass, to meet a specific requirement.

Features

1. 4mm hard coated reflective dark green glass, has appropriate transmittance for visible light, higher reflectivity for infrared ray, and higher absorption rate for ultraviolet;
2. 4mm one-way reflected dark green color glass, it's a kind of sun control glass, limits heat penetration into the building, make the interior more comfortable;
3. 4mm dark green online reflective glass, it's a kind of color decorative glass, the vivid color could make the building more charming.

Specification

Size: 2140x3300mm, 2250x3300mm, 2140x1650mm, 2250x1650mm, 2440x1650mm, 2440x3300mm, any custom cut size.

Processing: cut into size 4mm dark green reflective float glass, 4mm dark green color reflective tempered safety glass, 8.38mm dark green float reflective laminated glass, 8.76mm, 9.14mm dark green color [reflective safety tempered laminated glass](#), and all kinds of customized composition dark green color [reflective insulated glass](#).

Application

4mm on-line sunlight control dark green coated glass is a kind of energy efficiency reflective glass, with stable physical and chemical properties, can be widely used in various types of buildings, like lighting windows, [curtain walls](#), [skylights](#), and so on.
