

# Good quality 5.5mm clear float glass

## Introduction

5.5mm clear float glass, also call 5.5mm colorless float glass, 5.5mm transparent float glass, 5.5mm incolor float glass, it's annealed float glass, produced by poured molten glass from the furnace and floated evenly onto a bed of molten tin.

## Characteristic

- No bubbles, no defects, no scratches
- Optical clarity with high light transmission
- Smooth and distortion free flat surface
- Flexible specification to reduce slice loss

## Specification

The 5.5mm clear float glass available standard dimension is 1650x2140mm, 1830x2440mm, 2140x3300mm, 2140x3660mm, 2250x3300mm, 2250x3660mm, 2440x3300mm, 2440x3660mm, and any custom cut size can be produced as per customer's requirement.

## Application

- 5.5mm colorless float glass is widely used to cut for [windows and doors](#) directly
- 5.5mm transparent float glass is the core base product for most of common glass products, so it's popular to use to make 5.5mm offline reflective glass, 5.5mm offline low-e glass, 5.5mm colorless [safety tempered glass](#), 5.5mm [acid etched glass](#), and different composition [laminated safety glass](#), heatproof insulated glass, etc.
