

High quality 6+6mm 12A spacer double glazing glass windows manufacturer china

Glass windows, which can be made by single glass panes (like clear float glass/[tinted float glass](#)/reflective glass/patterned glass/acid etched glass) or double glass panes (like [laminated glass](#)/insulated glass). Flat glass windows and curved glass windows are commonly to be used in our daily life.

6+6mm 12A spacer double glazing glass windows

It consists of two panes of [6mm glass](#) separated by 12A aluminum spacer and sealed together at the edge. The insulating airspace is filled with dry air or a noble gas, such as argon or krypton inside to slow the heat exchange and reduce noise levels. It is not only the decorative glass for your window, but also keep your rooms warmer in the winter and cooler in the summer.

The features of 6+6mm 12A spacer double glazing glass windows

The advantages of double glazing glass with different glass types

***[Low e insulating glass](#) windows

Two panes of glass with low e protection and insulating argon between the panes, blocks 94% of the sun's ultraviolet rays, helping to prevent fade damage to your carpet, furniture and window treatments.

***Obscure insulating glass windows

Lets the sun shine in while obscuring the view, protect your privacy.

***Tinted insulated glass windows

Helps blocks the sun's rays and keep rooms that get direct sun cooler.

***Tempered insulating glass windows

Strength and safety, usually shatters into small, square fragments instead of sharp shards when broken.

***Laminated insulating glass windows

To increase safety and noise control, provides added protection from intruders and reduce the outside noise.
