

## Insulated glass facades supplier

It's more and more popular to build the structural facades with [insulated glazing](#), because it not only could satisfy any special requirement of the building owners, like soundproof, heat resistant, high light transmittance, colorful decoration, etc., but also very easy for installation, could help builders finish the building in shorter time.

As one of the most professional glass processing factory, we produce different types of customized flat and curved insulating glazing for architectural facades, such as:

- clear toughened insulated glass 4+12A+4mm, 5+9A+5mm, 6+12A+6mm, 8+16A+8mm, etc.
- color reflective insulated glass, including online reflective insulating glass color silver, blue, green, bronze, gray, black, etc., off-line reflective insulated glass with customized color, different color low-e coating insulated glass, glass thickness 4+9A+4mm, 5+12A+5mm, 6+12A+6mm, 8+16A+8mm, etc.
- safety tempered laminated insulating glass with different glass composition, like 6mm low-e tempered glass+12A+13.52mm clear tempered laminated glass, etc.
- customized [triple insulated glass](#), like 8mm clear tempered glass+12A+8mm clear tempered glass+12A+13.52mm blue reflective tempered laminated glass, etc.

...

The biggest size we could produce is 3300x8000mm, and to make sure quality, all our insulated glass units (IGU) have done different test during production like Peel Adhesion test, Hardness test, Frost point test, etc., with high production capacity and strict quality control, we are 100% confident to supply you best quality glass and most satisfied service, warmly welcome to [contact us](#) any time for details if you have any enquiry.

By the way, except insulated glass for external facades or cladding, we also produce customized tempered [laminated glass for external wall](#) spider systems or point fixed glazing systems.
