

High safety transparent 15+15+15mm black silk screen printing laminated glass flooring

Why transparent floor glass is being loved by more and more Architect?

Because through it, our field of vision is wider and we can see more scenery below it.

Whatever for interior glass floor, like in drawing room

Glass corridor, etc.

Or for outdoor glass floor, like glass sky walk.

All above floor glass can provide us with wonderful visual enjoyment.

Sometimes for a good-looking appearance, our customers will require silk screen black border on the glass floor.

So what's the difference between floor glass with the black border and without it?

Here with some photos to show that.

1. When without the black border, the floor glass will be like this after installed:

We can see the frame under it clearly.

2. When with the black border, the floor glass will be like this after installed in a frame:

The frame under it is perfectly covered by the black border on the glass floor. The glass looks more beautiful and concise.
