China factory supply non slip glass floor

Floor glass, stairway glass, stair tread glass, staircase glass, it is more and more widely used on the stair of residential, commercial, industrial building, due to the glass not only create space and nature light, but also give the building a magical feeling. In normally, the slip resistance glass is the best choice for floor glass.

Slip resistance glass, it also called non slip glass, anti slip glass, skid resistance glass, etc. Due to its the slip resistance feature, widely used as floor glass. The glass thickness for non slip glass are commonly comprised by two or three or four layers of laminated glass, the glass thickness range can be 17.52mm to 40.28mm, like two layers of laminated glass 8+1.52mm+8mm 10+1.52mm+10mm 12+1.52mm +10mm 15+1.52/2.28mm+15mm 19+2.28mm+19mm or three layers of laminated glass 6+6+6mm 8+8+8mm 10+10+10mm 12+12+12mm or four layers of laminated glass 6+6+6+6mm 8+8+8+8mm 10+10+10+10mm etc. there also have some smaller applications may only need a single piece of 15mm or 19mm tempered glass may suffice. But it depends on the project and customer confirmed.
