

# Soundproof tempered laminated insulated glass facade factory

## About glass facades

Glass facade also named glass wall, glass cladding, facade glazing, curtain wall glass etc. A glass wall system is an outer covering of a building to reduce construction costs. When glass is used as the curtain wall, on one hand, natural light can come into the building deeply. On the other hand, structural glass facades are designed to resist air and water infiltration, absorb sway induced by wind and seismic forces acting on the building, withstand wind loads. Compared with conditional concrete exterior wall, glass facade is more durable for the exterior glass wall surface. The most important reason to use tempered laminated insulated for glass facade is due to its impact on energy efficiency and high safety.

## Specification of customized size structural glass facades:

Glass size: max size 3000\*8000mm. Customized size is accepted.

Glass shape: flat or curved

Glass type: clear tempered glass, color tempered glass, Low E tempered glass, ultra clear tempered glass, U shaped glass, tempered laminated glass, silkscreen tempered glass, patterned glass etc.

Color: clear, ultra clear, blue, green, grey, bronze etc.

Structural type: Semi United glazing, structural glazing, spider glazing system etc.

## The advantage of invisible curtain wall glass price

1. Glass facades provide many functions such as heating and cooling, also improve the energy efficiency of the building.
2. Exterior glass wall also provide a more interesting surface geometry while retaining the integrity of the architectural design. In this way, the building looks more attractive.
3. Compared with traditional concrete wall, it's more light on weight and makes the project more economic.
4. Soundproof, it makes the environment more quiet and make people work and live better.

## Other products of glass facades:

Excepted tempered laminated insulated glass facade, you can also get many different kinds of curtain wall glass from SHENZHEN JIMY GLASS such as [energy saving insulated glass facade](#), [low iron tempered insulated glass facade](#), [colorful U glass curtain wall](#), reflective insulated facade glass, [safety laminated glass curtain wall](#) etc.
