The characteristic of frameless railing glass

1. Clarity: It won't obstruct or detract from the area's natural features. It allows homeowners to enjoy the view of a nearby beach or distant mountains.
2. Safety: In our experience, glass is one of the strongest materials for fence, railing. It ensure your fence or railing stays put despite the elements.
3. Durability: Because glass takes the weather so well, it will last a lifetime even in extreme weather conditions. Aluminum and stainless steel fastening systems ensure that fasteners won't corrode from the weather.
4. Resistance to chemical corrosion: When conventional building materials are in constant contact with chlorinated pool chemicals, they quickly age and decay. Tempered glass and its stout metal fasteners resist chemical corrosion very well.

Application of 4+4mm laminated balustrade glass

- Balustrade for balcony
- Fencing for interior
- Railing for exterior
