

5mm clear reflective float glass factory price

5mm clear reflective glass, 5mm silver reflective glass, 5mm silver reflective coated glass, it is a high performance reflective glass, solar control float glass, be made by applying transparent metal oxidation film on [5mm clear float glass](#) or [5mm ultra clear float glass](#), will have high thermal performance of reflective glass. Excellent quality, high precise flatness, perfect to be heat treatment, like bending, tempering, heat strengthening, laminating, etc.

The features of 5mm silver color reflective glass

1. Thickness: 5mm. other thickness available in [4mm clear reflective glass](#), 5.5mm silver color reflective glass, 6mm clear reflective coated glass.
2. Color: Clear/silver clear/transparency. Other colors available in French green, dark green, ford blue, dark blue, euro bronze, golden bronze, euro grey, dark grey, etc.
3. Standard size available in: 1650x2200mm 3300x2140mm 3300x2250mm 2440x1830mm 3300x2440mm, etc.

The advantages of 5mm clear reflective coated glass

- Control solar energy radiation effectively, block far infrared radiation, have good effect of heat preservation and energy saving.
- With mirror effect, daytime privacy, preventing the subject from seeing through the glass.
- Reflective glass absorbs and reflects a major proportion of the sun's direct energy more effectively than tinted glass
- Hard coating, avoid the light pollution and build good ecological environment.
- Can be cut, bent, tempering, heat strengthened, laminating, insulating and without affecting the coating.

Applications of 5mm silver white reflective float glass

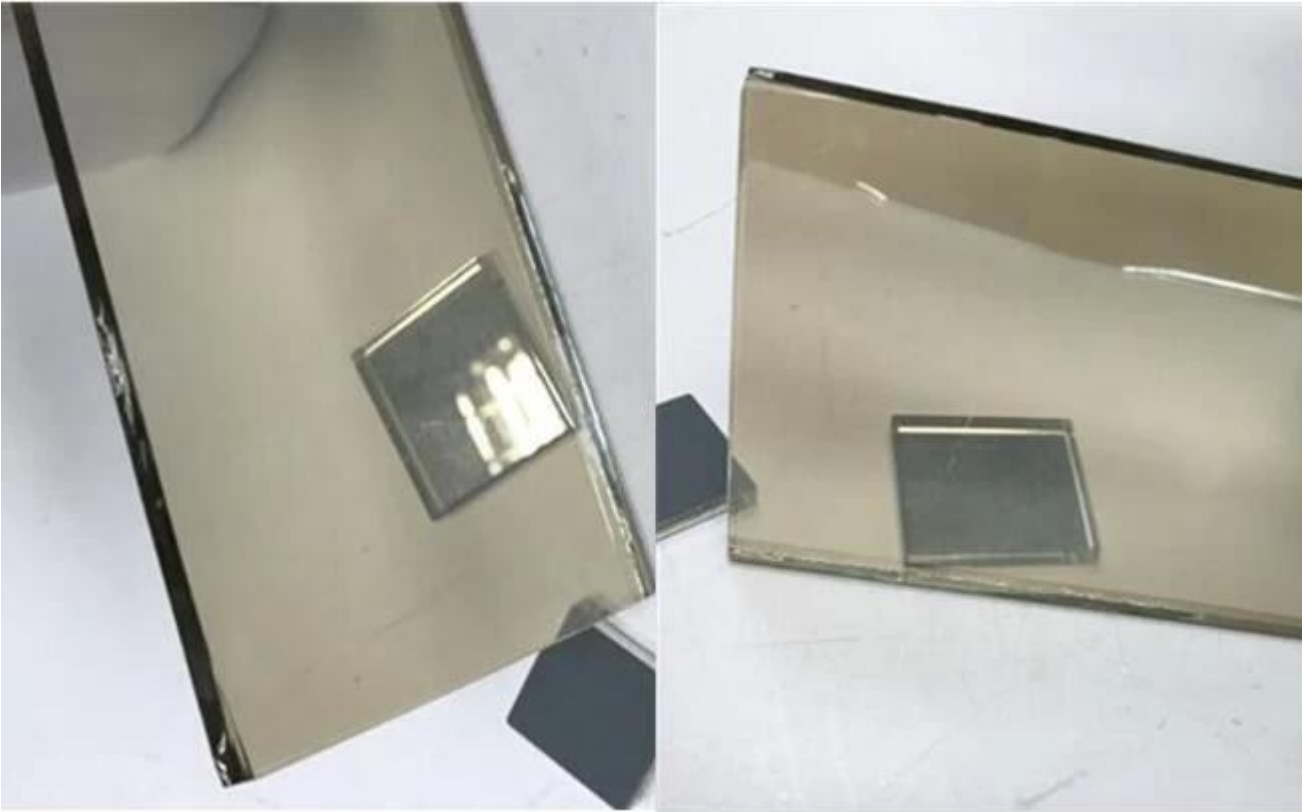

China factory high quality 5mm silver white reflective glass, it perfect to be made as 5mm silver color reflective tempered glass cut into size, 5+5mm clear reflective laminated glass, 5+5mm clear reflective insulated glass. Widely used for:

- Windows, door, table top
- Double glazed window
- Furniture and decoration

.....

Many others.
