

China high quality super clear frosted U profile glass factory

Low iron frosted U profile glass be made in [low iron glass](#) and do frosted on the glass surface. Its can be toughened and heat soaked and enameled with highly durable ceramic colors.

What is U-Glass?

U-profile glass is a U shaped cast glass whose u-shaped form increases its resistance to lateral wind loads and permits to install in exposed locations or in extremely long lights, without the necessity for intermediate horizontal or vertical supports. It can also be used in roofs, railing, skylight, partition, etc. It can be installed as single or [double glazing](#) in an aluminum frame, with or without a thermal break. The U-shaped profiles can also be installed horizontally, supported individually in the frame.
