

Good quality 3mm 4mm 5mm 6mm clear float glass for windows

Why use 3mm 4mm 5mm 6mm clear float glass to make windows?

No matter where we go, where we are, there are glass windows in every building, every house, and different place will see different windows, made with different types glass like clear float glass, tinted float glass, [reflective float glass](#), patterned glass, tempered glass, [laminated glass](#), insulated glass, etc. Among these glass, we believe that the normal clear float glass 3mm 4mm 5mm 6mm is most popular for the first floor windows, the reasons are as below:

- 1.The clear float glass is the core based product for most of the building glass, so its cost is much lower than other glass, and the thinner, the cheaper price will be. So use the 3mm 4mm 5mm 6mm transparent float glass to make the windows, will save a lot of money.
- 2.The [colorless float glass](#) has high light transmittance, use it on the windows, could make sure enough sunshine to get into house, in one hand, could save some light cost in daytime, in another hand, could make the interior dry and refreshing, won't mildew, give us a healthy environment.
- 3.The transparent float glass with high light transparency, could help us see outside clearly even we close the windows, and it is the most common glass, easy to replace with low cost when it is broken accidentally.

Specification
