

China factory price 4mm light green color tinted glass manufacturer

About 4mm French green glass

4mm French green glass is also named 4mm F-green glass, 4mm F-green tinted float glass, 4mm light green tinted float glass, 4mm F-green color glass etc. 4mm light green tinted float glass is produced by adding metal oxides during the manufacturing of clear float glass. As an energy saving decorative glass, 4mm F-green tinted glass can absorb the sun's visible light and weaken the intensity of sunlight.

Feature of 4mm F-green float glass

Thickness: 4mm. Other available thickness of F-green glass such as [5mm F-green tinted float glass](#), 5.5mm F-green tinted float glass, [6mm F-green tinted float glass](#), [8mm F-green tinted float glass](#), 10mm F-green tinted float glass.

Standard size: 2140*3300mm, 2250*3300mm, 2140*1650mm, 2440*1650mm, etc. Customized size is available.

Color: F-green(light green or French green). Other available color like dark green, dark blue, Ford blue, dark bronze, Euro bronze, dark grey(black), Euro grey etc.

Advantage of 4mm light green tinted float glass

- 1.Limiting ultraviolet light transmission to reduce the fading of furniture and heat gain inside the home by reflecting solar heat energy, in this way, saving the homeowner money in cooling costs.
- 2.Giving the outside of a building more attractive, aesthetically pleasing appearance. Creating different colors, the building can also take on a unique and interesting appearance while being insulated from the sun at the same time.
- 3.It's a kind of decorative glass, known as heatproof, energy saving, heat control and solar control etc.

Application of custom cut 4mm French green glass:

- 1.When using as window glass, we can cut it directly to special size as requirement.
- 2.After tempering, it's widely used for furniture decorative glass like table top glass.
- 3.When deep processed to 4+4mm light green laminated glass, it is widely used as handrail/railing/balustrade glass and interior partition wall glass as well.
- 4.It also can be processed to 4+4mm F-green color insulated glass and used for skylight glass, curtain wall glass etc.
